Protesters demand Thaksin's extradition

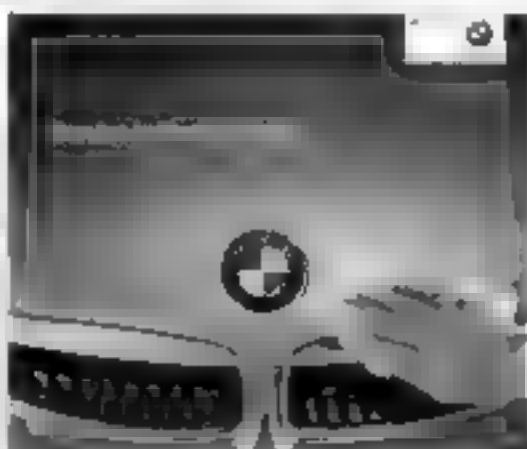

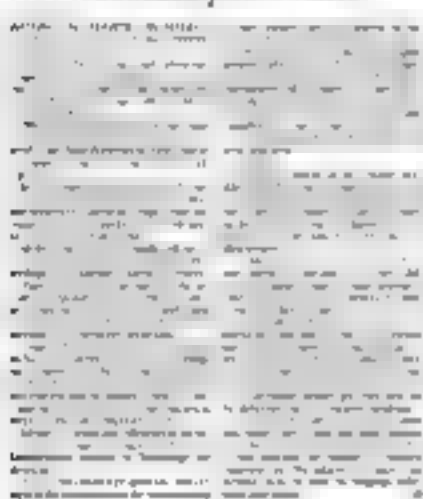

When you are asked to write a letter, you should first think about the purpose of the letter. Are you trying to inform someone, persuade them, or request something? This will help you decide what to say and how to say it. Next, you should think about the tone of the letter. Is it formal or informal? Should it be polite and respectful, or more direct and assertive? Once you have decided on the purpose and tone, you can start writing the letter. It is important to be clear and concise in your writing, and to use a professional and respectful tone. Finally, you should proofread your letter carefully before sending it to make sure it is free of errors and that it says exactly what you want to say.

Gov't goes slow on PNOC-EC privatization

By Will Toledo / Staff

PNOC-EC has agreed to sell only 40% of its exploration firm, a move that would leave the government with a controlling interest in the company. The agreement was reached after a long and contentious process that began in 1988. The government had initially wanted to sell 100% of the company, but PNOC-EC had insisted on a 40% stake. The agreement was reached after a series of negotiations and a final decision by the government to accept the 40% offer.

Food for thought for the health-conscious

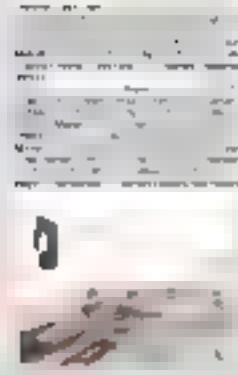

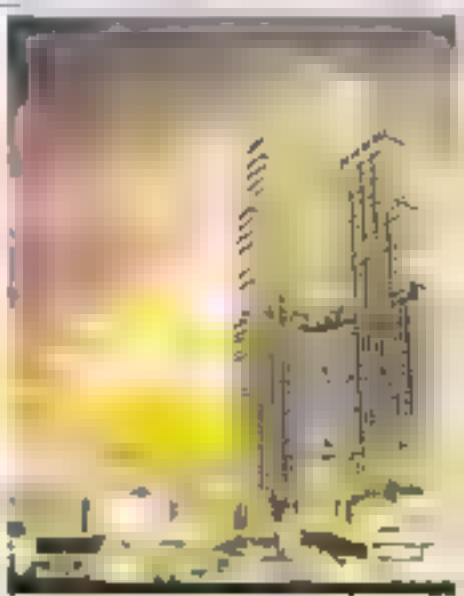

PHOTO BY JEFFREY M. HARRIS FOR THE PHOENIX NEWS SERVICE
 PHOENIX — A new study from the University of California, Berkeley, suggests that eating a diet rich in fruits and vegetables can help reduce the risk of heart disease. The study, which involved over 100,000 people, found that those who ate a diet high in fruits and vegetables had a 32 percent lower risk of heart disease compared to those who ate a diet low in fruits and vegetables. The study also found that those who ate a diet high in fruits and vegetables had a 21 percent lower risk of stroke. The researchers say that the benefits of a diet rich in fruits and vegetables may be due to the high levels of antioxidants and fiber found in these foods. They recommend eating at least five servings of fruits and vegetables a day to get the most health benefits.
